Village Completes New Sidewalks

The new tar sand sidewalks laid down by the Village authorities are now completed, and in excellent shape.

A thorough testing will be given the sidewalk running north past the Masonic Hall, as this walk is used daily by the school children, and the constant wear of the many feet should make a good test as to its durability.

In all, some 300 yards have been put down at an approximate cost of \$500.00, while to have laid a similar sidewalk in cement would have cost approximately \$250 more.

New Well Successful Skating This Winter

Completing his labours on the new town well at the proposed skating rink site, Hugh McIntyre reported last Tuesday that the well was down 75 feet, and that preliminary tests recorded 500 gallons in 35 minutes, without any noticeable lowering, the water level staying around 37 to 38 feet.

The casing was sunk Wednesday, and it is expected that the pump will be installed today, and a motor has been secured.

Commencing immediately the ground will be levelled off, and the waiting room moved from its present location on Main Street to the new site. At present no definite plans have been made in regards to fencing, it is possible that the Council will not erect the old fence at all, as it is felt that there is no need for a hockey rink here at the present time.

This new project of the Village fathers should prove a boon and provide many hours of pleasure for the kiddies, and become a decided community asset.

Marketing Act to be Discussed, Thurs., Nov. 1

A meeting will be held at Crossfield, sponsored by the Crossfield and District Board of Trade on Thursday evening Nov. 1st, commencing at 8 o'clock, when an address will be given by E. Brunsden on the New Marketing Act relating to the natural products of Alberta. J. L. Wilson, Government Field Supervisor of Livestock in Alberta will also address the meeting.

A special invitation is extended to all those who wish financial assistance in securing feeders and other livestock.

Dominion and Provincial Speakers Here, Nov. 5th

Alfred Speakman, M.P. for Red Deer, and R. M. McCool, M. L. A. will address a public meeting to be held in the U.F.A. hall on Monday evening, November 5th, at eight o'clock.

Mr. Speakman will give an outline of the business done at the recent session of parliament, while Mr. McCool will discuss provincial matters.

Duncan Cameron met with a slight accident last Saturday night when his car collided with a car driven by Wm. Snyder at a bridge near Ken. Cameron's place. We understand that neither driver is seriously hurt and the cars only slightly damaged.

Jack Bowlen, M.L.A., of Calgary, J. S. Herron, President of the Liberal Executive for Bow River, Jack Dillon, Liberal Organizer, and two or three other prominent Liberals of Calgary, were looking over Liberal fences here today (Thursday).

Who was the Crossfield gentleman who parked his car in a potato patch while attending a wedding party at Riverside, Calgary, on Saturday night.

Brings in Verdict of Accidental Death

Red Deer, Alta., Oct 18—Ten and a half months ago a fatal big game hunting accident 15 miles northwest of Rocky Mountain House resulted in the death of Olaf A. Kolstad, Airdrie. An inquest was deemed necessary now and was held at Red Deer, Wednesday afternoon of last week, with the chief coroner of Alberta, Dr. Braithwaite presiding. Gossip seems to have inspired the decision to re-open the inquiry, which resulted in a verdict of accidental death.

O. H. Kolstad, hotel proprietor, was on a hunting trip on December 1, 1932, with two companions, Ben Olson, and George Huser, the former a farmer in the Rocky Mountain House district and Huser of Crossfield. Kolstad was accidentally shot by Huser in mistake for a deer.

The inquest occupied nearly three hours. It took the jury seven minutes to arrive at a verdict of accidental death. At suggestion of the coroner, members of the jury questioned the witnesses freely.

E. E. Freeman, Innisfail, represented Albert Kolstad, and J. E. A. Macleod, K.C., Calgary, George Huser.

No Prosecution For Sunday Threshing

No prosecutions have been instituted by the Royal Canadian Mounted Police in the case of farmers threshing on Sunday, and it is unlikely any such action will be taken, according to Inspector Bavin, officer in charge of E. Division, R.C.M.P., Calgary.

In the event of complaints of this nature being received under the provisions of the Lord's Day Act, they are forwarded to the Attorney-General's Department at Edmonton and prosecutions must originate there.

Work of this nature, however, is regarded as necessary and therefore exempt under the Act, Inspector Bavin concluded.

FIRE PREVENTION

Crossfield has not experienced a fire for some considerable time, but we are of the opinion that it might be advisable to have the chemical engines tested and fully seen to that they are in A1 shape.

An inspection of the village with a view to ascertaining that all worn out stove pipes are replaced and other fire hazards are removed would not be amiss.

This work should be done before the cold weather sets in, as we all realize that we have nothing to fight fires with. An ounce of prevention is worth a pound of cure.

The Right Road To Follow

The grain growers of Alberta can do a great deal in the way of self-help by patronizing Alberta Pool Elevators. The proper ownership of grain handling facilities is with the grain growers themselves.

Alberta Pool Elevators

ORANGE PEKOE BLEND

"TOLL OF THE ROAD"

TEA

"Fresh from the Gardens"

The "Toll Of The Road"

When is a halt to be called to the ever mounting toll of deaths and serious injuries attributable to automobile accidents.

It is well nigh impossible to pick up a newspaper these days without finding a tragic heading recording one more—or several more—fatalities and to learn that some promising life has been snuffed out or the community has lost the services of some of its outstanding citizens.

If the total of killed and injured in automobile crashes of one kind or another, and from one cause or another, in all countries throughout the world could possibly be ascertained each and every day, and then made public daily, it would perhaps shock the consciousness of most people. The opinion may be ventured that many a war has been fought in which the average daily casualties were not as great as to-day's average "toll of the road".

If the same number of men, women and children were being killed and injured each day and every day in a war being waged on the North American continent, our newspapers, press societies, churches, governments, would begin to demand that a stop be put to the carnage.

But because the slaughter and suffering is merely the result of automobile accidents, people shrug their shoulders, give expression to some polite words of sympathy, wonder why there should be so many accidents, and then pass on to discuss the price of wheat, the result of the international yacht race, or the outcome of the world's baseball series.

Governments and communities the world over have improved and continue to improve roads and main highways. Hundreds of millions of the taxpayers' money is being spent annually in so doing, while the maintenance of these higher standard highways costs tens of millions more. And the better the roads, the more accidents.

Automobile manufacturers continue to take advantage of these better highways to turn out more powerful and even faster cars. They equip them with better brakes, better tires, safety glass, better devices of every conceivable kind, and then they are turned loose on the highways.

Volumes of laws and regulations are passed to control the operation of these cars and traffic regulations of many kinds are approved and ordered to be enforced. Some of them are; many are not. In fact, without a traffic officer posted every few miles and on every road, complete enforcement of the many laws and regulations is physically and practically impossible. People know this and proceed to ignore laws and regulations enacted for the protection of themselves as well as other people.

Glaring headlights which blind the driver of an oncoming car; only one headlight burning; no rear light; overtaking and passing and then cutting in ahead of another car and doing so at a high rate of speed; tearing up an incline in entire ignorance of the fact that another car may be mounting the other side; dashing in from a side road on to a main highway without stopping or slackening speed; operating cars with defective brakes,—but why continue the enumeration? These and many other violations of law and regulations are daily sending people to their deaths or to live on, helpless, suffering cripples.

When is it going to stop? How is it going to be stopped? Or have people become so reckless and so callous of death and suffering, and so careless of the rights of others, that they are quite satisfied that the "toll of the road" should go on mounting higher and higher?

The passing of even more stringent laws will not stop it, although they might prove, for a time, a great preventive. The better enforcement of existing laws and regulations would help, especially if the penalties for violation of them were made more severe. More and still more education of the people would ultimately bring some results.

But in the final analysis there is only one way in which this black blot on our present day civilization can be removed. The individual citizen must himself do it. Education, laws, law enforcement alone will never accomplish it. It is that strong, almost all-powerful Human Factor, which so many people to-day are inclined to ignore in the realms of society, economics and in relation to all public policies and acts, which constitutes the weak link in the chain of public conduct and public relationships.

Individuals must take this great problem in hand. They must not only understand and obey the law themselves, but whether they like it or no not they must individually become members of the public weal and take an active part in solving the problem, rather than maintain a merely academic interest in it, saying "Let George do it," and relying on law and policemen to do what law and policemen alone can never do.

Would Be Interesting

Print Shop Of William Lyon Mackenzie May Recovers Museum

It should prove possible to restore William Lyon Mackenzie's old print-shop at Queenston, Ontario, and to furnish it, as it is suggested, with the type of equipment used in publishing the first issues of the Colonial Advocate, the building might very well become a museum for the display of early printing equipment and early specimens of the printer's art in that part of the Dominion and thus lead to considerable notice on the part of visitors. Mackenzie was one of the first newspaper editors to fight and suffer for the freedom of the press in Canada, a principle now universally acknowledged, and his efforts in that behalf are entitled to greater recognition than that which is generally accorded them.

Four new telephone exchanges are opened in England and Wales every month.

Looseness Of The Bowels During The Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels. Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system. Do not check the discharges too suddenly. Do not experiment with a new "cured" remedy but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 68 years. Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it. Put up only by The T. Millburn Co., Ltd., Toronto, Ont.

Only One Drawback

Johannesburg People Do Not Like Cattle Roaming On Streets

Johannesburg. It is almost superfluous to remark, in a very progressive city. We knew this for ourselves and even if we didn't, there are plenty of tactful and discerning visitors who come here and tell us so. So rapid, in fact, is our advance, that Professor Coulter, of the U.S.A. was made to feel like Rip Van Winkle on revisiting us after only five years' absence. We have, he tells us, "an integrated communal machine, a group co-operating various agencies, a long-time plan, a city social-conscious, dynamically interested, with a clear-cut purpose." He might have added that we also have a system which permits horned cattle to run loose in the principal streets. Very few modern cities can say the same.—Johannesburg Times.

INDIGESTION?

Then Try KRUSCHEN at NO EXPENSE

If you suffer from loss of appetite, indigestion, sour stomach or a miserable feeling after meals there's nothing like Kruschen for relief. The little daily dose of Kruschen first stimulates the flow of gastric juices to aid digestion, and then ensures a complete, regular and unflinching elimination of all waste matter every day.

If you suffer, you'll welcome the opportunity to try Kruschen. Ask your druggist for the Kruschen Giant Package. This is the Kruschen Bottle, together with a separate FREE TRIAL bottle. Use the Trial bottle first. Then if you are not entirely convinced that Kruschen will do everything claimed for it, return the Regular package unopened to your druggist and he will redeem it at full value. But act quickly or your Free Trial Bottle will be gone. Your druggist has only a limited supply.

Snake On Hunger Strike

Prize Bushmaster In Bronx Zoo Refused To Eat

When Dr. Raymond L. Dittmar, curator of mammals and reptiles at the Bronx Zoo, New York, returned from Trinidad with a living specimen of the bushmaster, a deadly tropical snake he had hunted for a quarter of a century he intimated the struggle was over.

But the bushmaster is slowly going the way of his three bushmaster predecessors in the last 35 years at the zoo. He won't eat, he hasn't taken a morsel since he was caught. The freshly killed rats which Dr. Dittmar hopefully tosses into him every two or three days are spurned. So is every other choice tid-bit on the menu for bushmasters.

Woman Dispatches 'Planes

Looks After Passengers And Mail In All Weather

The aeroplane dispatcher at Concord, New Hampshire, airport is a woman, Mrs. Alice L. Marston.

Four times daily a tri-motored passenger, mail or express aeroplane alights there, and whether it be 35 below zero, as it was once last winter, or 90 in the shade, as it was more than once this summer, passengers are greeted by a trim, diminutive lady who smilingly takes their tickets, assists them to alight and then tosses the mail bags on board or takes them off.

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT (Grapho-Analyst) (All Rights Reserved)

(Editor's Note: Interest is increasing in these articles on Character from Handwriting. Many readers are taking advantage of the author's offer to give them a personal reading of their own writing. If you want your handwriting analyzed, read the announcement at the foot of this article.)

I mentioned in an earlier article that a handwriting expert—a Grapho-Analyst—is not a magician. He is not one who, by waving a magic wand, can transfigure you. He cannot, by the mere expression of certain weaknesses in your character, change these weaknesses into strong chains of character.

A Grapho-Analyst's position is that of an adviser. He can dissect your character and your talents; he can probe your nature and put his finger on the weak points, and he can delineate the good traits that you have.

It is up to the "patient" whether or not he acts on the suggestions of the Grapho-Analyst. If you go to a doctor, and he makes certain suggestions for treatment, based on his diagnosis of your case, it is up to you whether you follow out his advice.

So with the Grapho-Analyst. This science of reading character from handwriting will be of tremendous help to you, and will, if you follow out the advice that is given you, based on your handwriting, be of incalculable value to you.

Various correspondents have asked certain questions. Some of these have already been mentioned in my previous articles, but will be worth while reiterating one or two of them. Because in any consideration of the science of Grapho-Analysis, these facts must be borne in mind. Can handwriting tell sex? . . . No, it cannot. We all know that men and women who have very strong qualities and virile personalities—who act like men—are commonly supposed to act like men. And these women write like men. This is because there are certain definite masculine qualities—aggressiveness, for example. This shows in the writing.

And some men are very effeminate. They write like men. And these characteristics show up in their writing. But it is not possible to lay it down as a basic law, that sex can be shown from handwriting. It is possible to diagnose ailments and diseases from handwriting. There are certain diseases, as heart trouble, for instance, which can be diagnosed from handwriting. But this angle of Grapho-Analysis is merely in the early experimental stages.

Nothing definite or scientific can be laid down in this matter, at the present time, and, for that matter, Grapho-Analysts do not attempt to inform questioners as to their specific ailments. Grapho-Analysis is a scientific delineation of character and talents from handwriting, and such, is of tremendous value to you. It is definite and unassailable on these lines. As to the question of exercise, a tremendous power for good.

Do you want to know the traits of character that your handwriting reveals? A personal analysis may be the means of swaying your whole future. And as you wish to know the secret characteristics of your friends' send specimens of the writing you wish analyzed, and enclose 10c coin for each. Send with 3c stamped addressed envelope, to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg, Man. Letters are read and analyzed, and answered as soon as possible, but please allow about two weeks for your reply.

Will Take Referendum

To Test Great Britain's Traditional Policy Of Splendid Isolation

"Great Britain's will for or against her traditional policy of splendid isolation" shortly will be tested by a thorough referendum conducted by the League of Nations union.

Each citizen will be invited to answer five questions as follows: Should Great Britain remain a member of the League of Nations? Are you in favor of a general reduction of armaments by international agreement?

Are you in favor of general abolition of national air forces by international agreement?

Ought the manufacture and sale of armaments for private profit to be banned by international agreement?

If one nation is resolved to attack another, do you believe that the other powers ought to force that nation to renounce its designs, either by non-military economic measures, or, if needs be, by military measures?

The Daily Express some time ago conducted a straw vote, the outcome of which supported the newspaper's stand favoring a British isolationist policy.

The present semi-official referendum is intended to prove the contrary. Its backers contend that the results of the vote will be conclusive because the questions were put in a very elementary fashion.

New Turkish Alphabet

Has Made Reading And Writing Simpler For People

Two million Turkish men and women have learned to read and write in the past five years. This is the result of the introduction of the new Turkish characters, derived from the Latin ones. Before the introduction of the new alphabet only about a million persons—less than one in ten—could read and write. The old Arabic hieroglyphs were very hard to understand and harder still to write, states Reuter. Mustafa Kemal Pasha, the Turkish President, was so keen on the language reform that he earned the nickname "School-master-in-Chief" by giving lessons in the new script to Ministers and Deputies.

Ruler Was Marked Man

King Alexander Had Escaped Death On Many Occasions

King Alexander of Yugoslavia was one of the most shot-at monarchs in Europe.

In 1916 he narrowly escaped death when a man threw a bomb at him.

In 1920 he had a second narrow escape from a bomb at Sarajevo.

In 1921 another attempt was made on his life. This time one member of his entourage was killed and six wounded. The incident occurred at Belgrade.

In June, 1931, another bombing attempt was unsuccessful.

A year later, in May, 1932—the King's palace was bombed.

Canada supplied Malta in 1933 with over \$360,000 worth of goods, mostly wheat and flour. The imports from Malta to Canada for the same year totalled \$150.

Jacques Carlier sowed turnip seeds in Canada during his third visit of exploration in 1541. That was nearly ten years before the first turnips are believed to have been introduced into England from Holland in 1550.

Said to be the oldest dated optical instrument in the world, a telescope sold recently in London bore the date 1645.

Wider Distribution of Good Seed Is a Prime Essential In Putting Farming Back On Paying Basis

One of the improvements most to be desired in Canadian agriculture is a reduction in the number of varieties in use of cereals and other farm crops, and the more careful selection and better cleaning and grading of the seed of the best varieties.

A small per centage of farmers who make use of the best varieties make use also of the best seed cleaning methods, with the result that the seed which they sow in all particular superior to the seed used by their neighbors, and it is scripturally and actually true that as they sow, so they reap. Their crops are likewise superior.

On the other hand it is true that many are unable to state the variety of the wheat, oats or other important crop they are growing. This is equivalent to saying that they do not know whether it is good, poor or indifferent seed in quality. Other farmers, again, are familiar enough with the variety names of their crops but have been misled on the subject of the merit of any particular variety, and may be prizeing highly one which is not the best adapted to their particular locality or which perhaps is of inferior quality wherever grown. Failure to compare carefully the merits of the different varieties and to choose the variety in each crop which under the prevailing local conditions combines both high yield and good quality is a misfortune, first from the standpoint of returns to the individual grower and secondly from that of the nation's total production.

Unfortunately, too, are the results from using seed which is not pure as to kind and variety. There are many instances where one kind of grain has been so contaminated with another, or one variety has been so mixed with one or more other varieties of the same kind, that the resulting crop has been unsuitable for seed and has suffered serious deterioration in market value. Differences in varieties as to time of ripening, colour, size and shape of kernel, and in milling and feeding quality, emphasize the desirability of keeping each variety as pure as possible. Fortunately there are to-day in every province of Canada individual growers and societies of farmers who are specializing in the production of Registered, Certified or Improved No. 1 seed of the common agricultural crops. Their efforts in improved seed production, and the distribution of their product among other growers are being encouraged by both the federal and provincial Departments of Agriculture.

An Unusual Traffic Problem

Rickshaw Men In Poling Wanted To Cut Corners

Consternation was caused among Poling's 30,000 rickshaw men recently when a new regulation forced them to go around international traffic signs instead of cutting across the shortest route, as they have hitherto been permitted to do. They readily understood that a motorcar should observe such a rule, but could not conceive of any sensible person going farther than was necessary on foot. As most rickshaw pullers are so illiterate that they cannot read even the simplest regulations, traffic policemen awaited for days trying to explain verbally the logic of taking the long way round a corner, and in untangling the traffic line-ups which resulted from the frequent arguments. White directional arrows on asphalt street corners helped considerably, but on unpaved streets confusion continued for a week.

Kept Her Word

It happened at a Wellesley class reunion. "Why, Winifred! It is just wonderful to see you! Sit down, my dear, and tell me about yourself. Are you married?" "Yes, I'm married." "Imagine it! I remember in school you always said you wouldn't marry the best man on earth." "I didn't."

Two Russians, who recently scaled Avach, a volcano 8,160 feet high, in Kachkaia, crossed a barrier of snow and found the fiery crater, 450 to 600 feet deep and a mile in circumference.

There is a world surplus of oils and fats.

The most fatal of all lethal weapons is the unloaded gun.

W. N. U. 2069

Guessed At It

But Nervous Office Boy Was Very Wide Of Mark

We know office boys well enough not to doubt that this actually happened. The directors of a big company were holding a meeting, and in the midst of a discussion of a weighty question one of them said a fact they wanted had just been printed in the latest Saturday Evening Post. There wasn't a copy in the director's room, so the chairman of the board rang for an office boy. In came one, wide-eyed, shy, and nervous. The chairman of the board barked at him to get a Saturday Evening Post. The boy didn't understand at all, but he wasn't going to say so. He just backed out. Ten minutes went by, during which the important gentlemen were restive. (On an average, it is estimated, their time is worth a dollar a minute). Then the boy came back, in his hand a small paper bag which he handed the chairman of the board. The latter took the bag, with a very strange look on his face, and drew from it a sardine sandwich on toast. We've known office boys to miss further than that.—The New Yorker.

By Ruth Rogers

BUTTONS TRIP DOWN BACK OF SMARTEST DRESSES THIS SEASON—SUCH A YOUTHFUL MODE!

Here's a charming little dress done in black novelty jersey. A sporty type for general daytime occasions. A white bengaline collar completes this youthful costume. The buttons are black bone.

For "back-to-college" a gay angora plaid in red and grey is jaunty with white starched linen collar and red bone buttons. Make the collar detachable so it can be easily removed for laundering.

Materials such as cotton crepe, satin crepe, maroon crepe, novelty rayons that suggests wool, etc., are also suitable mediums.

Style No. 729 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust.

Size 16 requires 3 1/4 yards of 39-inch material with 1/2 yard of 36-inch contrasting material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

SAVED FROM CHINESE BANDITS

Our picture shows (centre and right), Mr. R. Lury and Mr. E. P. Johansen, officials of the Metro-Goldwyn Film Corporation, photographed after their rescue from bandits who wrecked a train in Manchukuo and kidnapped them. The bandits were located on an island by an aeroplane.

Position Of Canada

Domination Has No Ambition To Command Dominating Place In The World

Col. Thomas Polson tells Canadians, through the columns of a British magazine, this Dominion is destined to be the "dominating country of the Americas," and that we shall probably get to that proud position in about fifty years.

It is gratifying, of course, to be told how great a future awaits this Canada of ours, and to know that her possibilities and resources are coming to be better known in the old lands. But this "dominating" idea will stir no great enthusiasm among Canadians.

Europeans probably can't understand it but the fact is Canadians do not aspire to "dominate" anybody or any country other than themselves and their own country. They fully intend to maintain and develop their own national existence, but do not waste much time worrying about whether or not the Dominion is to become more populous and more wealthy than the United States, and no time at all dreaming dreams of national dominance.

This idea of "dominating" other peoples and countries has been the curse of Europe. It has killed generations there, driven a half dozen of the leading countries to political repudiation their war debts to the United States, and turned the old world into a snarling menagerie, whose inmates are always threatening to break the bars of their cages and fall upon each other tooth and nail.

We want none of that on this side of the Atlantic. Perhaps, to the intelligentsia of Europe, Canadians seem hopelessly low-browed. So that as it may. Our highest national ideal is to attend strictly to our own business and let all other nations do the same.—Edmonton Journal.

Canada was the largest supplier of fertilizers to Southern Rhodesia in 1945 and she was also the third principal supplier of foodstuffs during the same period.

Customers of fashionable shops of London may now be photographed in gowns and jewelry they think of purchasing and make their final choice after studying the prints.

Butter From Canada's Prairies

Survey To Be Made Of 100 Creameries Operating In The West

An analysis of the operations of approximately 100 creameries in Canada's Prairie Provinces—Manitoba, Saskatchewan, and Alberta—is being undertaken by the Dominion Department of Agriculture in co-operation with the agriculture departments of the provinces concerned. Creameries have been selected in the three provinces in proportion to the total number of creameries operating and the total volume of butter made. The primary purpose of the study is to provide information that will assist creamery operators to increase the efficiency of their plants. Factors affecting cost-management policies, methods of financing, sales policies, and other matters will be given consideration.

While the Prairie Provinces of Canada are famous throughout the world for the quantity and quality of the wheat grown on their fertile plains, they are also important for their production of dairy products, and in 1933 contributed 105,851,200 pounds, or over 32 per cent, of Canada's total butter make. Prairie creameries accounted for 62,626,200 pounds of this production, the balance being dairy butter.

In common with wheat, butter produced in the Prairie Provinces is second to none in quality. Western Canada creameries scored heavily at the Canadian National Exhibition in Toronto this year when a Manitoba creamery won the silver cup for the highest scoring creamery "butter" exhibited. Ten Manitoba creameries and one from Saskatchewan were included in the first prize group for salted butter in a 14-pound box, and in the class for salted butter in a 56-pound box, Manitoba had 28 entries of which 27 obtained prizes.

East Suffering Too

The Prairies are not the only part of Canada where privation and drought are bringing hardship to man and animal. In parts of Guysborough, Antigonish and Pictou counties, and to a lesser extent in Yarmouth and Shelburne counties, there is practically no hay and grain crops were quite short. The Nova Scotia Department of Agriculture is planning to assist in providing hay for winter feed.

Wife (previously): "Henry, you might at least stop and get this fly out of my eye!" —The Humorist, London.

Scientists Discover How To Convert Wood Into Glucose, The Fundamental Of All Foods

The eye of scientists are on a little factory which has just been opened at Mannheim-Rheinau in Germany. This factory has been built with the support of the Nazi government. One of the scientists responsible for it is a Lancashire professor.

Lorry loads of wood are going into it, and are being transformed by intricate chemical processes into some of the essential foods of life.

It means that it will be impossible in future for any country with timber to be starved out in time of war. The timber is turned by dilute acid treatment into sugar—not ordinary sugar, but glucose, the fundamental of all foods.

Glucose can be converted easily into yeast, foodstuffs, alcohol, resin, glycerine—for nitro-glycerine explosives—and a hundred other things. Already the work is on a commercial scale, and millions of acres of European land, which are regarded as useless except for timber, now become of equal economic importance with cultivated farm lands.

The chemists responsible for this discovery are Dr. Friedrich Bergius, a German scientist, and Dr. W. R. Ormady, a research chemist from Wigan, Lancashire, who is now living in London.

Dr. Bergius has been working on the subject for 15 years. Dr. Ormady joined him 10 years ago. British firms who have been supporting Dr. Bergius and Dr. Ormady in their research will share in the benefits of the discovery.

There are 3,000,000 acres of woodland in Britain. The state controls 200,000 acres, and the other 2,800,000 acres are private property.

Britain, according to the latest figures, has only 1,580,000 acres of land under oats—less than half the woodland acreage.

This means that Britain, if equipped with these factories, could draw

on 3,000,000 extra acres of land for a food supply in time of emergency.

Dr. Ormady said: "Germany realized the importance of this discovery because of her experiences during the war."

"She had to starve her population to provide material for explosives. But now things are different, and that is what Hitler meant when he said recently: 'German scientists with German materials are going to make Germany an independent nation.'"

"Every year on every acre of forest land nearly the same amount of digestible cellulose and other carbohydrate foods are produced as on an acre of land under oats."

"Only about half of the available wood can be used as timber, and it became obvious to us that there was an enormous source of raw material for the production of foodstuffs at the disposal of mankind if only we could find a technical process to transform it into glucose."

"We soon discovered how to make alcohol from wood."

"We then found out how to produce a digestible sugar which can be used as human food directly in the form of pure glucose, or indirectly in the form of a cattle food."

"The production of yeast followed quickly."

"The factory at Rheinau is now capable of producing each year more than 6,000 tons of pure carbohydrates for food."

"The discovery is as important a factor in guaranteeing an independent food supply as the coal hydrogenation process is in guaranteeing independence from supplies of foreign oil."

A reporter tasted some glucose. It is like sherbet, but is sweeter and less effervescent.

Two tablespoonsful are said by chemists to be equal in food value to a whole meal.

Would Reduce Street Noises

Italy May Make Autists Drive Without Tearing Horns

As a result of recent tests, Italy in considering the abolition of street noises by forbidding the use of automobile horns. This silent regime has already been employed at night in England with success.

Every Italian automobile operator "drives with his horn," resulting in a bedlam of noise unequalled in any other country. All taxis and most private cars are equipped both with electric alarm and the old-fashioned horns with rubber bulbs.

At present all honking has to cease for the night at 11 p.m. to give citizens some chance to sleep. Recently a "week of silence" was tried out in Milan and there was not a single accident. Now it is planned to ban horns altogether throughout the country.

Barbarians Advertised

Had Signs Over Caves Telling About Axes And Clubs

In the course of an interesting address on "Advertising" to his fellow-members, Harold Vanderlinder, secretary of the Wallaceburg, Ontario, Kiwanis Club, declared that "the newspapers are the greatest medium of advertising in the world. Mr. Vanderlinder took his listeners back to the cave-man period, when advertising was first introduced by the barbarians with signs over their caves, advertising their stone axes and hammers and clubs. The same form of colored-pole advertising as is now still used by barbers was employed by the Roman tinsorial artists he said.

Biggest Clock In Asia

Buddhist Organization Building It On High Mountain Peak

The biggest clock in all Asia will be erected by a Buddhist organization on the highest peak of Chihlu mountain in Anhwei province. It will be placed in a high tower and its mechanism alone will weigh 35,000 pounds.

It will be outstanding for the inscription on its copper face of the entire Buddhist scripture dealing with the God of the Earth. Under the clock in the first storey of the tower will be housed the image of the same divinity.

Six Buddhist societies have combined to raise the money required for the clock tower, which will be completed by the middle of 1936.

More than 200 greyhound racing tracks are in operation in England.

Canada Not Infested

By Japanese Beetle

Traps Set But No Sign Of Destructive Insects Found

No signs of infestation by the Japanese beetle, which has been doing serious damage to trees, shrubs, flowers, fruits, vegetables and lawns in the northeastern states, have been found in Canada.

Early in July of this year, Japanese beetle traps, in which were placed geraniol and eugenol, two essential oils used as perfume, to which it has been discovered that beetles are strongly attracted, were distributed in the Niagara Peninsula, Toronto, Montreal, Saint John, N.B., and Yarmouth, N.S., districts. The traps were distributed to determine whether the beetle had invaded Canada but none have been caught in any of the traps. The trapping activities attracted considerable attention from the public.

Many persons submitted insects to the Entomological Branch and to Entomological Inspectors which were thought to be the Japanese beetle, but none of the insects proved to be such. The Japanese beetle was first found on this side of the world during the summer of 1916 at Philadelphia, Pa., and since then it has multiplied and spread in the north-eastern part of the United States and has been discovered at several points not far from the International Boundary. It is one of the most destructive of foreign insects. The co-operation and assistance of the public is appreciated by the Dominion Entomologist and his staff.

Would Not Like It

Prince Of Wales Knew Lots About His "Great-Granny"

"Are there any kings and queens in Heaven, or when you are an angel is everybody equal?" asked the present Prince of Wales when, as a child of seven, his portrait was being painted by Mrs. Gertrude Massey, the well-known artist in miniature. Mrs. Massey replied that all were equal in Heaven. "I think that is quite right, but great-granny won't like it," replied the Prince. "Great-granny" was Queen Victoria.

Sir Kingsley Wood, British postmaster-general, told the advertising convention at Leicester he attributed much of the recent record increases in the business of the British post-office to extensive and consistent advertising.

A newly synthetic oil or lubricant especially adapted for aeroplane and other motors, has been discovered in old-fashioned paraffin.

SUNDAY SCHOOL LESSON

OCTOBER 28

THE CHRISTIAN'S STANDARD OF
LIFE

Golden text: "And be not drunken with wine, wherein is riot, but be filled with the Spirit." Ephesians 5:18.
Lesson: Ephesians 4:17-5:21.
Devotional reading: Colossians 3:12-17.

Explanations And Comments

The Old Man: The Unbelieving Gentiles, 4:17-19. In these verses Paul warns his readers against the life of non-Christians. His opening words, "This I say therefore and testify in the Lord," remind one of Christ's words, "Verily I say unto you," having the same solemn force as the latter, calling attention to the weightiness of the words that are to follow, to the importance of his readers' hearing and heeding. And the exhortation is, "that ye no longer walk as the Gentiles also walk." Paul is writing to Gentiles, and in these words there is an implied compulsion, for they separate his readers from the non-Christian Gentiles. But his readers are living in the midst of these non-Christians, and in danger of being influenced by their evil ways, and therefore Paul earnestly warns them against a relapse.

Do not live as they do, he urges; they are without intelligence, without God, their consciences are hardened into callousness, they have given themselves over to the grossest sensuality.

The New Man: Believing Gentiles, 4:20-24. Paul now tells his readers that, unlike the Gentiles of whom he had been speaking, they had learned the true teachings of Christ. "It is so that ye henceforth and were taught in him" does not imply any rather intimate that the things can be taken for granted. The word may be rendered, "as it may be assumed that Christ was the sum and substance of the message ye received, and that after accepting him ye were instructed in vital truths." The manner and character of this instruction is further defined as being even as truth as in Christ. In the historical Christ, in Jesus of Nazareth, are embodied the true standards of living. In Christ, the purity, the holiness, which his followers are expected to accept, to assume, to reproduce in their lives. The Gospel is in the fullest sense "the way, and the truth, and the life" (Charles R. Erdman).

Must "put away the old man," their old selves, with all their evil propensities which they had before they knew Christ, and being "renewed in the spirit of their minds," must put on "the new man," the new self, "that after God hath been created in righteousness and holiness and truth."

Little Journeys In Science

COAL

(By Gordon H. Guest, M.A.)

A century ago, the great British statesman, Sir Robert Peel, said that the future belonged to the nation which could produce the most coal. Certainly the importance of coal cannot be over-estimated, and there is little doubt that the sudden curtailment of the world's coal supply would be an unbearable blow to our civilization. In transportation, manufacturing, and for heating it is widely used, and the production of those mighty tools of man, iron and steel, depend upon it.

Coal is known to the scientist as a carbonaceous mineral, because carbon is a fundamental part of its structure. Formed from the luxuriant vegetable growth of early geological ages, it is the product of the slow decomposition of these materials in a limited amount of air. Geologists tell us that the conditions most favourable to its formation are found in fresh-water lakes bordered by flat marshy land, on which an abundance of vegetation grows. The plants grow, decay and grow again, pushing their way up into the lake and gradually building up on the bed a mass of peat, which is the first stage in the development of coal. Gradually the mass hardens first forming lignite or "brown" coal. As hundreds of thousands of years pass, the layers of peat are buried by masses of clay and sand which harden into rock, and which through the heat, pressure, and chemical action in the soil become first bituminous and then anthracite, or hard coal.

It is estimated that the coal which is now being taken from mines, was deposited forty million to one hundred and fifty million years ago. Fifteen thousand million tons of coal are mined each year, and it is said that at the present rate of consumption, the earth's coal supply will be exhausted in five thousand years.

No Undue Rush

During 1901 a Sanitary District in Chicago was sued by a construction company. Recently the case was finally wiped from the court docket because of the failure of the complainant to prosecute. At least it can be said that the court did not act hurriedly, or in a manner that in any way deprived the plaintiff of his civil rights.

For every 100 new automobiles that are sold to-day, about 107 used cars are sold.

The dog population of London is estimated at approximately 500,000.

Famous Geologist Dead

Sir Edgeworth David Blew Up Mes-

sinus Ridge in 1917
Sir Edgeworth David, the famous geologist, the first man to reach the south magnetic pole, died in Sydney (Australia), aged 76. He was born in Wales. Sir Edgeworth was scientific officer with the Shackleton expedition in 1907-9. In 1915, although 57, he went to France on active service as a sapper. He rose rapidly to the rank of lieutenant-colonel, becoming geologist to the British Armies on the Western Front. He was who planned the blowing up of Mes-sines Ridge on June 7, 1917, thus preparing the way for the British advance. He made millions for Australia through his discovery of minerals.

Combats Invading Bombers

New Method Devised To Offer Pro-

tection Against Aerial Attacks
The "invisible smoke" barrier against invading bombers has been so perfected that a squadron of fighting planes was forced to land during recent trials.

The engines of the planes were choked by the "metal dust" into which they flew.

This invention means that cities threatened with attack from the air may be protected—until some method of protecting the aircraft from the "invisible smoke" is discovered.

Since the invention of printing in the fourteenth century, nearly 900,000,000 volumes of the Bible have been printed.

To Make Whitewash Glossy

A whitewash can be made glossy like paint by dissolving a pound of cheap bar soap in a gallon of water and adding to it five gallons of thick whitewash mixture. Lime can be made more soluble and will penetrate further into the wood by adding a pint of molasses to every five gallons of whitewash.

MAKE YOUR FALSE
TEETH HOLD FAST

Eat, talk, sing and shout and never fear embarrassment. Your false teeth stick all day long when you sprinkle on Dr. Wernert's Powder—they fit snugly—comfortably—they can't slip. Prescribed by world's leading dentists—they know it's the best! Quite but little—any druggist.

I'll

**TELL YOU HOW TO COOK
3 VEGETABLES AT ONCE
IN THE SAME SAUCEPAN**

with no odor... less cost... better results

Place each in its own bag made from Canapar Cookery Parchment. You seal in all the mineral salts and flavor, this way . . . and there's no odor, not even from cabbage or cauliflower. You need only use ONE burner—turned low.

And vegetables are only one food that can be cooked better with Canapar. For instance, when boiling or steaming fish, all the goodness and flavor are retained—and there's no odor—no sticky pots and pans to scour. This alone makes Canapar worth using.

Remember that Canapar won't absorb odors. You rinse it off—hang it up to dry and use it repeatedly. Try it as a dish cloth, especially for glasses—it does not shed lint.

McFARLAND MAY RETIRE FROM POST INSIDE YEAR

Winnipeg.—John I. McFarland, general manager of the central selling agency of the Canadian Wheat Pools, told a private gathering of delegates to the annual meeting of the Manitoba Wheat Pool he expected he would retire from his post in about a year.

Taking an optimistic viewpoint of world marketing problems, Mr. McFarland said his "job" should be over in a year and that he would then be able to turn complete pool management over to the elected pool representatives.

The wheat surplus was fast disappearing and the glut on the market was being eliminated, he said, in spite of the operations of Argentina, "the bad boy" of the London wheat agreement. Once this big problem is over, he said he could see no reason for remaining with the pool.

Premier John Bracken of Manitoba also addressed the gathering, taking part with Mr. McFarland in the "heart-to-heart" talk with the growers. The Manitoba government would never have apologies to make for advancing money to the pools, declared Mr. Bracken in a reference to the difficulties which the pools encountered following 1929 and 1930 operations.

Dealing with Manitoba affairs, Mr. Bracken said the Manitoba government probably would finish the financial year with a balanced budget, exclusive of relief expenditures. Accepting financial reports showing net payments to pool farmers of 66½ cents a bushel on the 1933-34 pool, delegates to the annual convention of the Manitoba Wheat Pool voted to continue the voluntary pool policy with privileges of accepting street prices for their grain.

The delegates discussed and approved the federal government's action in establishing a national barley commission and saw in the appointment of the commission another step towards planned agriculture, long sought by farm organizations of the West.

Grain Smugglers Arrested

U.S. Farmers and Farm Laborers Have Admitted Guilt

Fargo, N.D.—Fourteen Townier county farmers and farm laborers, alleged by the government to have smuggled thousands of bushels of Canadian wheat into the United States and sold it, pleaded guilty in United States district court before Judge Andrew Miller.

Passing of sentence was deferred at the request of P. W. Lanier, United States district attorney, until the Grand Jury term of court which opens Oct. 23.

Those in court were charged either with directly hauling the wheat to American markets or with conspiracy in connection with the delivering of the wheat to others who marketed it.

Arrest of Thomas C. Wildish, Ellsberry elevator man, alleged by the government to be one of the key figures in the smuggling, was announced a few hours before the 14 Townier residents appeared for arraignment.

Winnipeg.—Demand in the United States for soft grains for making macaroni was seen here as the cause underlying the smuggling of wheat from Canada across the international boundary into the United States.

Miners in Hospital

Pecs, Hungary.—From many parts of the world came messages of sympathy and encouragement for the 1,200 miners who remained on a five-day underground hunger strike in a dramatic fight for better wages. One hundred and ten of them were in such a condition they were taken to a hospital after they were brought out.

Fruit For Drouth Areas

Toronto, Ont.—The national relief committee of the United Church of Canada announced it had arranged during the last fortnight for transportation to needy parts of Saskatchewan 40 carloads of Ontario fruit and vegetables. Many of the cars, the committee said, were filled on a community basis.

For Water Survey

Winnipeg.—Appointment of a Dominion government commission to investigate means of water conservation in southwest Manitoba was urged here by Mayor Ralph H. Webb, upon his return from an inspection trip in that area.

W. N. U. 2049

Alberta Resources

Royal Commissioners Consider What Sum Dominion Should Pay

Ottawa.—The royal commissioners considering what sum the Dominion should pay Alberta to even up accounts in the handing back of the natural resources to the province was given an outline of the credits claimed by the Dominion. Among other things, the Dominion should be allowed credit for a portion of the cost of the Hudson Bay Railway, it was contended by J. MacGregor Stewart, of Halifax, who is one of the Dominion counsel.

The mention of the Hudson Bay Railway brought on an interesting discussion in which the three commissioners, Mr. Justice A. K. Dwyer, Mr. Justice T. M. Tweedie, and George C. McDonald took part.

Mr. Stewart took the view the Dominion embarked on the Hudson Bay Railway because it held the natural resources of the three prairie provinces and planned to pay for it out of the money obtained from disposal of these resources.

Now that the Dominion had to account for all the money it received from the sale of lands and other resources and reimburse the provinces, it should receive credits for obligations the administration of these resources brought upon it.

Commissioner Tweedie asked Mr. Stewart if the Dominion government had borne the cost of developing other projects as national undertakings. With this admitted, Mr. Justice Tweedie suggested the cost of port developments in Nelson and later in Churchill might be considered a national obligation. About 38 per cent. of the entire cost, of the enterprise went into port developments.

Further it was claimed that the Dominion should be given credit for relief and seed grain given to farmers in Alberta while the natural resources were held by the Dominion. Mr. Stewart declared the relief was granted because the Dominion held these resources, and the farmers helped were settlers on Dominion land.

Sell Lands Too Cheap

Criticism Of Disposal Of Alberta Lands By Federal Government

Ottawa.—The Dominion government was criticized for disposing of Alberta farm land, either by giving it away to settlers or selling at \$3 per acre when as much as \$25 per acre was being realized on similar areas. Mr. M. Porter, counsel for Alberta, appearing before the natural resources commission, was arguing the claim of that province for compensation for alienation by the Dominion government of 25,000,000 acres of western land.

Mr. Porter quoted extensively from sales records between 1908 and 1930 to support his claim the lands could have been profitably disposed of.

A number of maps were filed in an attempt to show lands situated in closely-occupied areas, with land prices of from \$6 to \$25 prevailing, were by the act of 1908 either given away for nothing as homesteads, or sold at \$3 per acre as purchased homesteads or pre-emption.

Must Secure Licenses

Radio Branch Is Getting After Many Delinquents

Ottawa.—Radio owners delinquent in paying their license fees may find the long arm of the law reaching out after them. The radio branch of the department of marine is now resorting to legal action.

A limited number of prosecutions have already been launched on a wide front and it is proposed to follow them up with more. The prosecutions are widely scattered in order to attract public attention. So far the prosecutions have been quite effective and license fees are now coming in at a better rate.

Makes Quick Recovery

Warsaw, Poland.—The paralysis which kept Peter Milewicz motionless for 30 years took a sudden turn for the better—too sudden for a couple of would-be robbers. When the robbers stalked into the paralytic's home in the village of Markenik, near Wilno, the invalid suddenly vaulted out of bed, grabbed a gun, and began to fire away at the startled marauders, who promptly fled.

Dominion-Wide Broadcast

Moose Jaw.—The Philharmonic Society of Moose Jaw will broadcast over a Dominion-wide hook-up on November 18 commencing at 8 o'clock in the evening. The program will be broadcast from St. Andrew's United church. The Philharmonic Society of Moose Jaw is one of seven Western choirs asked to put on a program for the C.R.C.

For Better Films

National Council of Women Deplores Low Standards

Ottawa.—With the declaration that "low standards in the motion picture field have a direct relationship to juvenile delinquency and crime," the National Council of Women lined up in support of measures to clean up the pictures.

The council carried unanimously the following resolution: "Realizing the powerful influence of the cinema in moulding and educating public opinion;

"Realizing too the fact low standards in the motion picture field have a direct relationship to juvenile delinquency and crime;

"The National Council of Women annual meeting assembled, would therefore strongly urge all its federations, local, provincial and national, to lend their support to efforts being made at the present time to secure a production of pictures which would assist in character development and provide a medium of wholesome recreation."

A resolution which deplored "the increasing tendency of the Remembrance Day services in many parts of Canada to be a military pageant and a diplomatic ceremonial," evoked discussion but was referred to the convenor of the League of Nations committee so it may go to local councils for expression of their opinions thereon.

DOUKHOBORS TO SELL LANDS IN SASKATCHEWAN

Winnipeg.—Peter Vergin, president and chairman of the board of directors of the Christian Community of Universal Brotherhood, Ltd., announced the entire holdings of the corporation in Saskatchewan were up for sale.

Speaking through an interpreter, Mr. Vergin declared he could not at present disclose future plans for the sect in Saskatchewan.

First announcement of the sale came from John McDougall, an advisor to the Doukhorb chief. Bids by tenders were being called for on the properties, he said. "They will liquidate their holdings in Saskatchewan," said Mr. McDougall. He said the bids would be received here.

The Christian Community of Universal Brotherhood owns 36,000 acres of land in Saskatchewan and has a membership between 6,000 and 8,000 persons. It was believed here many would remain on the land in Saskatchewan while others might move to British Columbia where the brotherhood owns 40,000 acres which is not all being cultivated.

Failed To Take Precautions

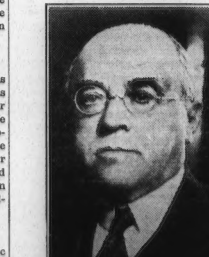

King Alexander Lost Life Because He Did Not Wear Bullet Proof Vest Belgrade.—King Alexander of Yugoslavia lost his life because he did not wear his bullet-proof vest.

The king, assassinated last week in Marseilles, owned two bullet-proof vests. He had intended to wear one of them in France as he had done a month before on a visit to Bulgaria.

But when he went ashore from the cruiser Dubrovnik at Marseilles, an admiral's uniform was his garb. The Associated Press learned he put on the bullet-proof vest, then found the admiral's uniform-tunic would not fit properly over the coat of mail.

He removed the vest at the last moment and went ashore with a perfectly fitting uniform but without the protection he had planned.

PROMINENT IN FRENCH NEWS

Because of the fact that the French people believe the police were lax in not protecting King Alexander of Yugoslavia from assassination, Albert Sarraut, (left), French Minister of the Interior and head of the police force, has been forced to resign. It is also expected that Henri Cheron, Minister of Justice (right), may be forced out of office due to his department's failure to satisfy the public in its conduct of the investigation into the Slavsky scandal.

HON. W. J. PATTERSON

Minister of Telephones in Saskatchewan, who announces that the Provincial Government has leased telephone circuits to interested parties for use for broadcasting, telephone communication or for telegraphic use.

Winnipeg To London By Air

Western Flyers Vision Regular Schedule To Be Covered In 48 Hours

Winnipeg.—Winnipeg to London by air in less than 48 hours and on a regular schedule is the plan of a group of local flyers revealed here.

Roy Brown, Ted Stull, Milton Ashton and Jack Moar, four men prominent in flying in northern Canada who combine more than 25,000 hours of flying experience, are convinced of the feasibility of such a project and see in the "northern route" the base of a daily air service with the Old Country.

The route they have studied lies on almost a direct west to east line from Winnipeg to the Faroe Islands and then south to the northernmost tip of Scotland. It crosses Hudson Bay, Baffin Land, Greenland, and Iceland.

"This proposed service would not be a hit or miss affair," declared Mr. Moar. Air conditions, communication bases and type of equipment had all been closely studied, he continued, and he was convinced there would be a regular air service within two years.

No War Spirit

General Smuts Does Not Think World Is On Verge Of Another Conflict

Dundee, Scotland.—"I do not agree with those who think the world is on the verge of another great war," declared General Jan C. Smuts, empire statesman, who played a leading part in the last conflict, as he delivered his recital address to the University of St. Andrews.

General Smuts, noted soldier and scientist, former prime minister of South Africa, has been rector for the past three years of the 500-year-old university, but this is the first occasion on which he has been able to be present for induction. His term expires in a few months.

Scaremongers were doing their best to create an atmosphere of war, but despite them, and the present lamentable failure of disarmament efforts, and despite the vogue of "silly drilling and strutting about in uniform," he said, "I do not find real war nearer anywhere."

Ask Addition To Agenda

Vancouver.—British Columbia has suggested that the question of responsibility for unemployment be added to the agenda laid down by Prime Minister R. B. Bennett for the impending conference of premiers on possible constitutional amendments, Premier T. D. Pattullo stated.

Would Abolish Ratio System

Japanese Delegate To Tri-Power Naval Conversation States Position

London.—Admiral Isoroku Yamamoto, Japanese delegate to tri-power naval conversations here, said today Japan will demand abolition of the ratio system of limiting naval armaments.

Instead, he revealed, the island empire will seek to substitute the global tonnage basis.

These proposals will be made to representatives of the United States and Great Britain in the course of talks scheduled to start here next week.

Yamamoto's announcement came soon after authoritative sources had disclosed the Americans, Norman H. Davis and Rear Admiral William H. Standley, will suggest substantial revision in general naval armaments and renewal of the Washington and London naval treaties.

Garnet Wheat Standards

Tentative Grades Passed For Nos. 1 And 2 By Committee

Winnipeg.—Leaving incomplete work to a sub-committee, the Western grain standards committee closed its two-day meeting. Tentative standards were passed for Nos. 1 and 2 Garnet wheat to give the inspection department a basis for grading Garnet separately from the red wheats in the Canada Grain Act, takes effect. These grains will serve until such time as sufficient quantity of Garnet from the 1935 is delivered to permit of new standards being set.

The sub-committee appointed will deal chiefly with the low grade grains, all other working having been completed during the meeting. The proposal for two grades of feed grain, because of variation in weight, was among the subjects given the sub-committee.

Wheat Export Cut

Australia's Surplus Will Be Less Than Last Year

Rome.—Australia's surplus of wheat for export will be about one-third less than last year, the International Institute of Agriculture estimated.

The institute reported this year's crop at 136,800,000 bushels, as compared with 174,800,000 bushels last year, and the average of 180,400,000 bushels over the last five years. Allowing for a domestic consumption of 55,000,000 bushels, the export surplus will be not much over 80,000,000 bushels.

WHEAT POOL WILL PAY DEBT TO MANITOBA

Winnipeg.—Assurance indebtedness of the Manitoba Pool Elevators, Ltd., to the Manitoba government would be paid in full by Paul F. Brett, Kenman, Man., president, in the directors' report submitted to the annual meeting of the pool organization.

"The progress made in the last three years, despite light crops, is a very definite indication that the Manitoba Pool Elevators will be able to meet its obligations to the government," said Mr. Brett. "There need be no anxiety on the part of taxpayers generally that any loss will be occasioned by its operations."

The report showed a net operating surplus of \$361,046. Payments of \$184,972 due the government this year had been met in full and the \$48,768 unpaid last year was paid this year. The indebtedness of the pool to the government, totalling \$2,100,000 when the pool was reorganized in 1931, has been reduced to \$1,649,402 at present. The balance of the operating surplus, approximately \$125,000, was added to the reserve account.

A payment of about \$60,000 had been made to the Saskatchewan and Alberta pools on terminal No. 1 at Port Arthur. This plant was estimated to be worth \$50,000 and there remained approximately \$200,000 to be paid the two sister organizations within seven years.

"When reorganization took place in 1931," continued the report, "Manitoba Pool Elevators, Limited, owed the Manitoba government \$2,100,000. This had been reduced to \$1,649,402."

"The progress made despite light crops in Manitoba the last three years is a very definite indication that the Manitoba Pool Elevators will be able to meet its obligations to the government in the future, and there need be no anxiety on the part of the taxpayers, generally, that any loss will be occasioned thereby."

CALL FOR FULL PROBE INTO THE ARMS TRAFFIC

Ottawa.—The National Council of Women has called upon the Canadian government to take the initiative in proposing that "a full and untrammelled" investigation be now opened into the operations of British manufacturers and traffickers in arms. The investigation, it was expressly stated, should include any Canadian subsidiaries of these firms.

On motion of Mrs. A. C. Bagley, of Vancouver, seconded by Mrs. Walter Lyman, of Montreal, the council approved the following resolution sponsored by the Local Council of Women of New Westminster:

"That in view of the deadlock in the disarmament conference and of the alarming renewal of competition in armaments and the otherwise inexplicable recent increases in the demand for the raw materials of munitions, revealed by growing budgets for armaments and the extension of war preparations everywhere, the Local Council of Women of New Westminster:

"Appeals to all men and women of goodwill to realize the danger and to join in practical measures for averting it.

"Records its conviction that the safety of the world demands an adequate control of the manufacture and traffic in arms and so far as is necessary the sale and supply of raw material, and

"Calls upon the Canadian government to take the initiative in proposing that, in view of the general concern in Canada over the charges made against the manufacturers and traffickers in arms as fomenters of war, charges in which British firms are involved, that a full and untrammelled investigation be now opened into the operations of these firms, including any Canadian subsidiaries that may be indicated."

Funeral Of Murdered King

Body Of King Alexander Is Laid To Rest In Natic, Czecho

Belgrade.—The body of the murdered King Alexander was placed near those of his ancestors in the royal memorial chapel in his native city of Topolo.

While men bore the sarcophagus up a hill through trilled lanes to the chapel all activities throughout Yugoslavia remained at a standstill for two minutes as the people paid tribute to their fallen king.

Then, as Alexander was laid in the tomb which he had only recently completed, church bells were tolled throughout the country. They mingled strangely with heavy guns on land and sea which roared out a mighty dirge.

Trumpets sounded a farewell "taps" for the dead soldier-sovereign. "Mignon," as Alexander called his wife, Queen Marie, took leave of her royal consort and the doors of the tomb were closed.

New Medicos

Westerners Pass Examinations Or Meet Council

Ottawa.—Successfully passing the examinations of the Medical Council of Canada, held at Montreal and Winnipeg early this month, 49 physicians, including three women, are now entitled to registration as practising doctors. They may become licensed in any province in Canada.

Among successful Western candidates were: Robert Thomas Atkinson, Saskatoon; Paul G. Egnatoff, Saskatoon; William James Fowler, Carleton Place; William Adrian Hargrove, Hodgeville, Sask.; John King Kelly, Regina; Donald Albert McBurney, Saskatoon; Maurice Hutchison Moffatt, Bradwell, Sask.; Edgar William Pickard, Oxbow, Sask.; Ormond Murray Ranson, Abernethy, Sask.

Blaze At Summer Resort

Hudson, Que.—Fire raged through a section of this Lake of Two Mountains summer resort, causing damage estimated at \$250,000. The luxurious club-house of the Hudson Yacht Club, one of the largest ice houses in Eastern Canada, and two Canadian Pacific Railway refrigeration cars were destroyed. A number of homes were badly damaged.

To Make Return Flight

Dublin.—Lieutenant Cesare Sabelli, who crashed in Ireland with Captain George Pond on a recent unsuccessful non-stop flight from New York to Rome, arrived here recently, saying he planned a return flight from Ireland to North America.

Boys Guard B.C. Forests

Many Fires Have Been Stopped By Junior Fire Wardens

With little publicity concerning the valuable work they are doing, 4,000 British Columbia lads between the ages of 12 and 16, are assisting in the work of guarding the province's forests.

Many a forest fire has been stopped by one of the junior fire wardens of the Canadian Forestry Association before it really got started.

Instructed in practical forest fire protection, the boys work under the guidance of the local forest rangers in the various districts, and on scores of occasions have reported forest fires to the authorities, as well as extinguishing on their own initiative many small but menacing blazes.

Much of the credit for the organization of this youthful forest guard is due to Charles Wilkinson of the British Columbia branch of the Canadian Forestry Association.

It has been going on for some years now. From the 900 members in 1931, the junior wardens have shown rapid growth until the membership has reached its 4,000 mark and has an objective of 10,000.

Importance of the work being done there is indicated across the international boundary, where F. A. Silcox, chief of the U.S. Forest Service, declares that the forest fire losses in United States were more than cut in half in the first 10 months of 1933 as the result of the work of the Civilian Conservation Corps.

This body of young men is carrying on more extensively, but along some of the same lines, the work being done by British Columbia's junior wardens.

In the first year of their organization their report shows 396,769 man days were spent fighting fires.

Not only does the C.C.C. protect forests and fight fires, but it has been engaged to some extent on the work of reforestation.

Forest fires in 1932 swept over that country on the average of about \$200,000 a day, and in 1932 figures showed 43,000,000 acres were swept by fires.

Journey Nearly Over

Reindeer Will Likely Be In New Home This Winter

After a trek of four years across the roof of the world from Alaska, enlivened by a stampede for shelter in a blinding blizzard, 3,000 reindeer are waiting in the northwest corner of Canada to continue the journey to their new home.

The deer, purchased by the Canadian government in 1929, are scheduled to cross the mouth of the Mackenzie river with the coming of winter.

The 1,000-mile trek from Napaktook in western Alaska has been an adventurous one for the herders in charge of the deer. Early last January, the herd reached the Mackenzie river and attempted the 70-mile crossing to the east side.

But blizzards and high winds had blown the ice clear of snow, and many detours had to be made because the deer could not get a foothold on the slippery surface. After they had been crossing the river for 48 hours a sudden blizzard struck and the herd stampeded back along the trail.

A new attempt will be made when the river freezes, and it is hoped the deer will be delivered to their new grazing range of 15,000 square miles. The Canadian government purchased the deer to provide food and clothing for wandering tribes of Eskimos in the northland.

A Good Hotel

There is much being said to-day about the standards for good hotels. It used to be that a good hotel was known because on the table in the dining room there was a bouquet of paper flowers, a jar of pickles and a plate of soda biscuits. The customer could employ himself on the pickles and crackers while waiting for the soup to come along.

Canada's Blind People

Of the 7,119 blind persons registered in Canada, 2,508 reside in Ontario. This includes all ages, from infancy to the oldest registered person, who recently attained his 108th birthday, said L. M. Wood in his presidential address at the 16th annual meeting of the Canadian National Institute for the Blind in Toronto.

A modern machine will make cigarettes at the rate of 1,200 a minute as compared with the hand worker's five.

Many of the things we ask for are not worth having.

W. N. U. 2049

NEW GOVERNMENT DEMAND PUZZLES FORMER CABINET MINISTERS

More than 100 former British Cabinet Ministers have received a mysterious demand from Downing Street for the instant surrender of all official cabinet documents in their possession. The demand was made of every minister who held office since 1919, and in cases where ministers have since died, the request was made of their executors. Among the celebrities involved are: top, left to right, Arthur Henderson, former Foreign Minister; Sir Austen Chamberlain, former Foreign Minister; and Sir Herbert Samuel. Below, left to right: David Lloyd George, former Prime Minister; Winston Churchill, former Chancellor of the Exchequer; and Viscount Snowden, former Chancellor of the Exchequer.

More Than Man Deserves

Most People Are Not Worthy of Dog's Devotion

Dogs, so they tell us, cannot reason and do not think. Here in Ontario the other day a collie ended a trip of 250 miles undertaken on his own initiative in order to get back home. To him the trail was new, but he'd home in his heart, and the vision of a master he loved awaiting him at the end of the journey. That dog may not have reasoned, been quite incapable of thought, but he wangled through as successfully as if he'd passed college tests and taken honors in the art of transportation. Did he possess some extra sense—something more than a bump of locality? If not how explain his action?

Inexplicable as such a trip seems, there is still one thing harder to understand about a dog than his using up his own kennel from afar. Pedigreed pup or mangy mongrel they all have one divine characteristic—devotion. All dogs are one-man, although many of them will tolerate the attentions of outsiders. Where they give their loyalty they do not seem to matter. Indifference will not destroy their really. Wonderfully one question—what is there, what can there be in the human creature known as man to bring forth such devotion?

The way of a dog with his master is beyond understanding. The more one puzzles over it the more one is satisfied that human beings are much better than they are said to be—otherwise dogs would not live for them and die for them. Taken at the value his dog puts upon him any man is a demi-god—though his world holds him a flop and a failure.—Ottawa Journal.

Stop Signal For Speakers

Gadget Puts Crimp In Long-Winded After-Dinner Talkers

Science has done something about those long-winded after-dinner talkers. Ralph G. Raymond, director of the Chicago Lighting Institute, explained the gadget—a miniature stop and go light—to a meeting of air condition engineers.

"This gadget," said the speaker, "is an automatic control on the patience of listeners. You press the button and start the light. Give the speaker five minutes. For two and a half minutes the light will show green. Then for a half minute it will gleam through amber lens. Then it will turn red at three minutes. If he doesn't stop at the end of his allotted period, the light will be turned off and a loud bell will ring."

New York was the first city in the world to establish a city laboratory to produce and distribute diphtheria antitoxin.

The United States contains 500,000 restaurants, which give employment to more than 1,500,000 people.

Make Life Worth Living

Having A Pleasant Occupation Is A Great Help

"Work," says a veteran jurist, "is the best way to keep alive," but, without some modification, his prescription is both misleading and invidious. In the first place, keeping alive is a means to an end and not an end in itself, and "the profit of life consists not in the space but rather in the use." Merely to live to work to eat to live is a vicious circle which deprives man of his birthright and reduces him to the level of a beast, yet with additional acceptabilities which increase his capacity for suffering. Provided work is congenial it may well assist to prolong life and, what is much more important, it may make life worth living.

The next best thing to doing what you like, and as unsatisfactory as all next-best things, is to like what you do. This, however, requires such a colossal power of self-deception that it is beyond the attainments of a moderately alert intelligence.

Practically everyone who has lived beyond the allotted span of life possesses a firm conviction that the way to longevity lies through the observance of certain habits of life peculiar to themselves. In vaunting the regimen by which they believe they have attained old age these people must always be open to the query which Caesar addressed to an old soldier who sought to die: "Dost thou think to be alive then?"—Ottawa Journal.

Matches that go out after a definite period, after they have been lighted, and self-extinguishing cigarettes, have been developed by the U.S. bureau of standards to lessen fire hazards.

Held Great Exhibition

Over Million Persons Attended Native Products Show In Peiping

More than 1,500,000 persons attended an exhibition of native products held in Peiping recently in the Tai Miao, or Temple of Ancestors, in the Forbidden City. Porcelain, rugs, lacquer, furniture, silk and woolen goods and radio apparatus made in China were among the displays. It is estimated that more than \$500,000 (Mexican) worth of native goods were sold during the 40 days the exhibition remained open. One exhibit was a Chinese-invented motor-bus which burns charcoal in place of gasoline. It was made entirely in Hankow and carries 128 passengers. A novel feature was a temporary race track where sturdy Mongolian ponies were put through their paces. Employment of the Tai Miao, once the most sacred building in Peiping next to the Temple of Heaven itself, for such utilitarian purposes drew horrified but unavailing protests from conservative Chinese.

Make Snake Oil

Alberta Rattlesnakes To Be Used For Chinese Preparation

Alberta rattlesnakes will provide oil for the cracking joints of rheumatic Chinese, the Edmonton Journal says in a dispatch from its Lloydminster correspondent. George Lee, Lloydminster safe proprietor, will kill the snakes, "pickle" them in alcohol and have combination of snakes and alcohol shipped to Lee's father in China. There, oil will be extracted from the snakes and used as a cure for rheumatism. What will be done with the alcohol has not been revealed.

Chickens Are Low Grade

Canadian Producers Should Pay Attention To Crates Fattening

Only 23.83 per cent. of the chickens inspected in Canada during the fiscal year 1933-34 qualified for A grade. There is no mystery about the figure, nor is it difficult to point out the reason why the chickens did not grade higher. It was simply because they were not sufficiently fattened before they were marketed. Chickens must be well fattened and dressed to qualify for grade A, and there is a much higher percentage of birds degraded on account of not having sufficient fat than on account of having sufficient fat. It is useless, says the Chief Market, Poultry Inspector, to expect range fed birds or short period crate fattened birds to have the fat required for the top grades. It just does not happen. The matter of fattening birds and thus increasing the producers' revenue is entirely in the hands of the producers themselves. With the marketing of the poultry crop close at hand, now is the time for action.

By a simple method of crate fattening on a mixture of finely-ground home grains, there is no reason whatever why a very high percentage of the poultry marketed should not be made to qualify for grade Special and grade A. There are various fattening mixtures that give good results, but the point is to make use of the feed produced and available on the farm. Good results will be obtained if the birds are put in disinfected, warm, draughtless crates from four to six weeks before marketing. The birds should be fed twice a day morning and evening, on a ration of finely ground home-grown grains as follows: Equal parts oats, wheat, corn and cracked corn. Add potatoes at the rate of one-third of the total weight of the meal mixture. Mix with sour milk so that the mixture will pour easily. Further detailed information on crate fattening may be secured by writing the Dominion Department of Agriculture, Ottawa, for bulletin No. 125 on preparing poultry for market, or information may be obtained from the various provincial Departments of Agriculture.

Since poultry has been sold on official grades the differentials have been approximately as follows: Selected B, three to four cents over selected C; Selected A, two cents over B; Selected Special, one cent over A; and two cents more for the champion over Selected. This means that milked Special chickens are worth five cents per pound over Selected B, in the case of a one-pound A, four cents a pound. It is up to producers to increase their revenue from market poultry by crate feeding.

A Highway Menace

Vehicles On Highways Without Lights Constitute Serious Danger

Reports indicate that unlighted vehicles are abroad on the highways of Saskatchewan at night. For some reason or other they do not carry even a reflector that costs a few cents and that gives the approaching driver a clue that there is something ahead.

It is difficult to understand why drivers of unlighted vehicles, traveling on main highways, persist in risking their own lives and lives of others. It may be expected that one of these days, due to the early fall autumn darkness, fatal accidents will be reported from this cause. A number of persons will be killed. They will be dead when a little precaution and common sense would have kept them alive.

Is it generally known that the driver of an unlighted vehicle who may be damaged in an accident is virtually no standing when he comes into a court?—Regina Leader-Post.

What Our Birds Eat

As many as 7,500 weed seeds have been found in the crop of a mourning dove. Five thousand insects have been discovered in the stomach of one flicker, and a night hawk has been known to consume approximately 400 insects at one meal. Grasshoppers, caterpillars, moths, weevils, beetles, plant lice, and insect eggs compose part of the food of Canada's insectivorous birds while weed seeds are eaten by sparrows, snowbirds, buntings, juncos, finches, grosbeaks and waxwings.

U.S. Aids Farmers

Disbursements of \$453,308,968 to United States farmers by the federal agriculture administration up to October 5 were reported. This amount represented \$262,000 in rental and benefit payments and \$191,308,968 in purchases of hog, wheat, butter, cattle and seed surpluses.

A gopher works its jaws 200 times a minute when chewing.

Was Once A Prison

Abandoned Island Of Mexico Coast Grows By Grass And Cuts

An abandoned island peopled solely by a hundred thousand goats, wild cats and strange sea monsters; where the wreck of a schooner that left its skeleton dead on the cliff is the only mark of man within the century—such was island in Guadalupe, 200 miles off the coast of Mexico, according to James Glenn, one of the few living men to have seen its inhospitable shores, and a resident of California since 1867.

Twenty years ago this month Glenn shipped out from San Diego aboard the three masted schooner, Mary Dodge, in charge of an expedition to the unknown island of Guadalupe. In his pocket he carried permission from the Mexican government to bring back 4,000 goats to be canned in this country for war supplies—if he could.

"The moment we put ashore," said Glenn, "we felt that we were in a magic world. It was perfectly silent, only from the cliffs a face a thousand eyes watched our approach. In keeping with the feeling, we found on the beach a strange species of monster, half fish and half mammal, called the sea elephant, existing I am told, in no other waters in the world. From the front they looked like gigantic hogs without legs, but were easily and had huge fins and tails. They played in and out of the water but towered ten feet high, a mountain of flesh as they lay on the sand."

"There was only one side of the island from which the top could be reached, and as we ascended we drove thousands of goats before us. Once on top we found herds of cats that had gone wild a hundred years ago when the Mexican prison located there had been abandoned."

"We organized a drive and herded our goats successfully aboard the schooner. Hundreds of the wild things preferred death to captivity and leapt down into the sea. It was not a pleasant sight nor shall I soon forget it."

"Before we set sail we explored the crest of the rocks, past the mouldering ruins of the old fort, and there on a peak we found him. The skeleton of a man, peaceful and looking out toward the endless ocean. How long he had been there or why he was deserted no one will ever know."

"They left him there where he could watch the sea, custodian of the goats and cats and wild sea monsters, for since that time no ship has visited his strange domain."

Phrase Should Be Dropped

Inferiority Suggested By "Small Town Stuff" Is Unlabeled For

Actually there is nothing inferior about small towns. During the season of the depression they have made a good showing; they have exhibited fewer symptoms of distress than the large centres; they have retained the management of their own financial affairs.

People who live in small towns are not inferior to those in large cities; they find they must provide their own entertainment for one thing and they do it; they must use the boys of their own town to make a hockey team or a basketball team, and they do it. In the larger places all such service is provided by professional means.

There is much to be said for the small town. So much that it might be well to drop that phrase "small town stuff."

Grand Opera In Movies

Negotiations Said To Be Under Way For Famous Compositions

There are signs that the movies are going in for grand opera in a large way.

In anticipation of a rush for standard and classical selections, eight of the world's leading music publishers have banded together and appointed a single representative at Hollywood. He is Abe Meyer and to him falls the responsibility of negotiating for the sale of many of the most famous operas.

Among the firms he represents are G. Ricordi and Company, of Milan, Italy, which controls the works of Puccini and Verdi, and Eikan-Vogel, of Philadelphia, publishers of Ravel and Debussy.

Something To Aim At

The Winnipeg Tribune says those who take pride in the height of their hollyhocks and gladioli might be interested in hearing that a certain seaweed, the "sea giant," attains a length of 1,500 feet, while another variety has a stem more than 400 feet long.

Lots of us do things merely because other people do them.

FANCIFUL FABLES

**I
FRETTE
AND FUMED
AT
SLUGGISH
DRAINS**

UNTIL I USED

**It dissolves
clogging grease
—never harms
the plumbing**

WHY be annoyed by stopped-up drains? It's so easy to keep them clear and free-running. Simply sprinkle Gillett's Pure Flake Lye down each week. Use it full strength—it will not in any way harm the enamel or plumbing. It cuts right through all clogging matter... kills germs and destroys odors.

It's easy to see your own plumber this workless way, and you've no unwelcome bills to pay afterwards! Get a tin of Gillett's Lye from your grocer today. It will save you hours of unnecessary scrubbing and rubbing all over the house.

Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The new edition of the Gillett's Lye Booklet gives dozens of practical hints for saving time and work with this powerful cleanser and disinfectant; also contains full directions for soap making, thorough cleaning and other uses on the farm. Address Standard Brands Limited, Fraser Avenue & Liberty Street, Toronto, Ontario.

THE TENDERFOOT

By
GEORGE B. RODNEY
Author of "The Coronado Trail",
"The Canyon Trail", Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to see what was happening for himself—not as Gerald Keene, half owner of the Hour-Glass Ranch, but as Duro Stone, tenderfoot in a Montgomery Ward wild-west outfit.

Dad Kane, desert rat and luckless promoter 10' now, is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grumbled at the discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling Hour-glass cattle and protests against it.

Joe Carr's daughter, Edith, repulses Dustin when he wished to make her acquaintance, saying when she walked with a man, it would not be with a squaw man. He plans revenge, but has had no opportunity so far. Affairs on the ranch going from bad to worse, Joe Carr takes to drink.

(Now Go On With The Story)

CHAPTER III.—Continued

Somewhere the Broken Spur always found a market. Broken Spur cattle were shipped periodically to California to be fattened to bring the highest prices in a falling market while the Hour-glass could not pay its freight bills for such shipments. Poor old Joe Carr saw the Hour-glass go to pieces under his once able hands and he sought in vain for the reason. That suit over Soda Springs was the last straw.

"I know damned well they've been robbin' us deaf, dumb and blind," he snapped to big Crewe, his foreman. "But I can't prove it. What can I do? There's nothin' I can do, Frank."

"Huh. You might try leavin' the cork in that whisky bottle for a change," said Crewe, who was not inaptly named Frank. Carr cured him and on that occasion left the cork in the bottle... for an hour.

"I wish to God I could get track of that young fellow Gerald Keene," went on Carr fretfully. "You know how old Peter Vinton left the Hour-glass. Half to me and half to him and if one of us dies, the other gets the half of the one who dies. Funny way to leave a ranch. Nobody can find young Keene. Nobody knows his address. I've been runnin' into the red line right along by borrowin' cash to finance the Hour-glass for the last few years. I've been doin' it on my own responsibility. It ain't right that he shouldn't pay his share..."

"Listen here, Joe..."

Crewe wheeled on his employer. "I've known you for lifetime as men count. As a distiller you ain't much but as a steady consumer of bottled goods you're a big man. You know you use blinkin' facts that're right face up on the table. It's liquor that's helped put the ranch in the red... Red liquor. It might have happened anyhow but I know it helps a bad matter to sit worse. It's time somebody tells you..."

Carr began a futile protest but Crewe cut him short.

"You'd never have got into that card game in the Silver Dollar but for red liquor. That game cost you ten thousand and you know it. You'd never have tried runnin' a horse for the Conhula Sweepstakes if you hadn't been so full you couldn't fit the ground with your hat. Then you made a bet you'd win it and when you sobered up you wouldn't even hedge. A cattleman's got no business runnin' a horse except at the end of his rope. You know it when you're sober, too. That's what makes me so damned hot."

"I was tryin' to win back what I'd lost," said Carr.

"Hell, man! I know that. A fat chance you had of winnin'. Three strangers settin' in the game an' you with the only roll in town with Spike Goddard attin' in the game and a bar mirror behind you that you never even saw till too late. Man, you were asin' for trouble."

"Well, I got it all right at that. Listen here, Frank. Is there any way I can locate this man Gerald Keene? Can't you think of some way?"

"Simon Burwell of the Drovers Bank in Cato handled the ranch's business didn't he? Better write to him. What's the trouble, Joe?"

"Money," said Carr hoarsely. "I need money, Frank, and that's a fact."

"Can't you borrow enough at the Seco bank to tide you over? Old Pegram, the president there, ought to help you."

"Hell, man! It's old Icehouse Peg-

I know!... new aid in PREVENTING Colds

Remarkable New Formula is Especially Designed for Nose and Upper Throat where most colds start

AFTER years of research on the problem of colds, Vicks Chemists have developed a remarkable new preparation—Vicks Va-tro-nol. This exclusive Vicks formula is especially designed to aid the functions which Nature has provided—in the nose—to prevent colds, or to throw them off in their early stages. Used at the very first feeling of nasal irritation—just a few drops up each nostril—Va-tro-nol helps to avoid many colds altogether.

Relieves Head Colds at Every Stage

If irritation has reached the stuffy, sneezy stage—Nature's usual warning that a cold is developing—prompt use of Va-tro-nol helps to throw it off in the early stages.

Where irritation has led to a clogged-up nose (a stuffy head cold or nasal catarrh) Va-tro-nol penetrates deep into the nasal passages—reduces swollen membranes—clears away clogging mucus—brings welcome relief.

Va-tro-nol is *real medication*—not mere "oil drops"—yet is *absolutely safe* for children and adults. It has been clinically tested by physicians—approved by specialists.

Easy to use, anytime or place—at home or at work. Keep a bottle always handy.

Introduces Vicks Colds-Control Plan

This new aid in preventing colds is the ideal companion to Vicks VapoRub (modern external treatment for colds). Together with certain simple rules of health, these two preparations form the new Vicks Plan for Better Control of Colds. Records of thousands of clinical tests—made over a period of two years, and under medical supervision—indicate that Vicks Plan greatly reduced the number, duration and dangers of colds. (Full details of the Plan in each package of Vicks VapoRub and Vicks Va-tro-nol.)

YOUR DRUG-GIST now has Vicks Va-tro-nol. Also a limited supply of combination trial samples of Va-tro-nol and Vicks VapoRub—with Vicks Plan folder containing directions for using these twin aids to *fewer and shorter colds*.

Only Took Two Vacations

Man Was Street Car Conductor For 56 Years

Reuben C. Rice, who retired in 1930 after 56 years as a street car conductor in New York City, is dead at the age of 83. In 1925 he told a reporter: "It's a good job. I'm 78 years old. It has kept me in good health. I thought it was a good job when I was 24 and I think so now." In his fifty-six years of work, Mr. Rice took only two vacations; the first when he was married, the second, in 1925, when the company gave him two week's pay to celebrate his half-century of service.

The number of sheep in Manitoba for the past five years has remained around 216,000, the present year's total, but ten years ago there was only half that number. Sheep were introduced in Manitoba as early as 1880, when the Hudson's Bay Company was commencing to develop the country.

The new teeth of an elephant form at the back of the jaw and gradually work forward, shoving the old teeth out from the front.

Viscose, a material already put to use in the forms of artificial silk, sizing, and cement, is now made from an absorbent sponge.

nose? Don't you see the mess we're in? Dad Kane knows enough of what Corse and Gray were doin' up in the hills to put you and me both behind the bars for ten years. . . ."

(To Be Continued)

For the first eight months of 1934, the shipments of livestock from Western to Eastern Canada, namely 59,762 cattle; 636 calves and 45,222 sheep, showed increases in comparison with 1933 of 17,924 cattle, 428 calves and 10,739 sheep. Hogs which totalled 148,123, showed a decrease of 68,609.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver

Without Calomel
You are "feeling gray" simply because your liver isn't putting its daily two pounds of liquid bile into your bowels. Digestion and elimination are both hampered, and your entire system is being poisoned.

What you need is a liver stimulant. Something that goes further than milk, mineral water, oil, lemon juice or chewing gum or roughage which only serve the bowels—ignoring the real cause of trouble, your liver.

Take Carter's Little Liver Pills. Purely vegetable. No harsh calomel (mercury). Bile, pure. Ask for them by name. Refuse substitutes. 50c. at all drug stores.

Canadian flour imported into Hongkong during the first six months of 1934 showed a considerable increase over the figure recorded for the corresponding period of 1933.

Few Minutes Eases Neuritis Pains Now!

DISCOVERY BRINGING QUICK RELIEF FROM PAIN TO MILLIONS

Remember the pictures below when you want fast relief from pain. Demand and get the method doctors prescribe—Aspirin.

Millions have found that Aspirin eases even a bad headache, neuritis or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an Aspirin tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain

practically as soon as you swallow it. Equally important, Aspirin is safe. For scientific tests show this: Aspirin does not harm the heart.

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get **ASPIRIN**. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet.

Get tin of 12 tablets or economical bottle of 24 or 100 at any druggist's.

Why Aspirin Works So Fast

Drop an Aspirin tablet in a glass of water. Note that BUBBLES it touches the bottom, it is disintegrating.

IN 2 SECONDS BY STOP WATCH
An Aspirin tablet starts to disintegrate and go to work.

What happens in these glasses happens in your stomach—ASPIRIN starts "taking hold" of your pain a few minutes after taking.

When in Pain Remember These Pictures
—ASPIRIN DOES NOT HARM THE HEART—

Now Science Explains Why So Many People Past 40

Feel That They're Slipping Losing Their 'Grip' on Things

Many people "round 40" think they're "growing old." They feel tired a lot more. They have headaches, dizziness, stomach upsets.

Well, scientists say the cause of all this, in a great many cases, is simply an acid condition of the stomach. Nothing more.

Try this. Soon you'll feel like another person! Take either the familiar liquid "PHILLIPS" or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.

ALSO IN TABLET FORM: Phillips' Milk of Magnesia Tablets are now on sale at all drug stores over which each day is sold in the equivalent of one Phillips' Milk of Magnesia.

Attend Elks Supper

The Editor as the guest of A. (Happy) McMillan attended the banquet given by the Elks Lodge Calgary in honour of the visiting American Big League ball players, and the "ducks" were prime.

Many notables were present, and we had the pleasure of personally meeting many of the players, amongst whom were Halie Manush, Red Kross, and Ted Lyons.

The B. P. O. E. certainly show their visitors a good time, and everything for ones comfort was done that possibly could be.

ESTABLISHED 1907

THURSDAY, Oct. 25 1934.

Local News

Mrs. R. M. McCool is visiting friends in Calgary this week.

A. L. Frisk has disposed of his car.

J. M. Julson of Delia was renewing acquaintances here on Monday. Keep in mind the grand hallowe'en dance in the U. F. A. Hall on Saturday night of this week.

Now is a good time to pay your village taxes and save ten per cent. Get your bridge score pads and playing cards at the Chronicle office.

Mrs. Wm. Laut is visiting relatives in Calgary this week.

Mrs. C. Calhoun spent several days in Calgary last week.

Mr. and Mrs. Dick Ontkes of Calgary were visiting friends in town on Wednesday.

Adam Cruickshank is hunting ducks in the vicinity of Brooks, Alta. this week.

Fred Becker of Donalds is visiting his brothers Carl and Louis here this week.

E. D. High threshed 3072 bushels of barley from 66 acres of fall plowing.

R. M. McCool, M.L.A. left on Tuesday to spend a few days in Edmonton.

\$10.00 in cash will be given to the holder of the lucky ticket at the Armistice Dance on Friday, Nov. 9th.

Dr. McClelland was elected Vice-President of the Alberta Veterinary Association at their annual meeting held in Calgary on Wednesday.

Threshing is practically wound-up here. There is only two or three machines still running and they will finish this week.

Alex. (Scotty) MacAulay of Calgary spent the week-end at the home of his sister, Mrs. Wm. McCrimmon.

Mr. and Mrs. Wm. Stralo are in Calgary this week where Mr. Stralo is taking treatment for an infected eye.

Frederic R. Mason, brother of Mrs. Longmire, and son Leslie of Fort William, Ontario were Crossfield visitors last week.

The Junior W. A. are entertaining the Olds Juniors on Friday evening in the basement of the Masonic Hall 6:00 to 10:00 p.m.

N. King, R. M. McCool, F. T. Baker, George McLeod, C. H. McMillan and R. G. Gibson attended the district meeting of the Masonic Lodge at Calgary on Saturday.

Dr. H. A. and Mrs. Gibson of Calgary, and Mrs. T. Gibson and son Tom of Runney were Crossfield visitors last Wednesday as guests of Rev. and Mrs. Longmire.

The Secretary-treasurer of the M.D. of Rosebud will be in Carstairs for the convenience of taxpayers in that district every Friday from 2nd. Nov. till Dec. 14th.

On October 22, Norman Reid, trainer of Orilla lacrosse team, was the guest of his uncle and aunt, Mr. and Mrs. Richard Reid of Langley Prairie, B. C.

Mr. and Mrs. Frank Ruddy, Mr. and Mrs. Lee Ableman, Mr. and Mrs. Chas. Fox and their respective families, were Calgary visitors on Saturday and during the evening had the pleasure of attending a German wedding. A good time was had by all.

Citizens are again complaining about the riding of bicycles on the sidewalks.

It is now up to the authorities to take action against the offenders and see that this menace to pedestrians is put a stop to.

Big League Ball Players Visit Crossfield

Bruce Campbell of St. Louis Americans and Dick Porter of the Boston Red Sox, along with Calgary Sportsmen were visitors in town today (Thursday). They were shooting in the district and dropped in to the Home Cafe for dinner.

Coming Auction Sale

Wednesday, October 31—R. D. Sutherland's sale of stock, machinery, etc. 3 miles east and 1 mile south of Carstairs. Archie Boyes, auctioneer.

James Smart Fatally Injured By Quiet Horse

Trampled by a horse one of a team owned by a neighbour last Saturday morning, James Smart, three year old son of Mr. and Mrs. C. C. Smart, suffered injuries from which he died in the General Hospital, Calgary, early Monday morning.

The little lad had been playing close to the team, said to be a quiet pair of horses, and one of them stepped on him inflicting severe injuries to the child's abdomen. James was taken to the hospital at Calgary, where he was operated on but never rallied.

Funeral services were held on Tuesday from St. Frances Church, Crossfield, conducted by the Rev. Father Ross. Messrs H. A. Banister, James Morrison, J. W. Collins and Alf. Bailey acted as pallbearers.

The sympathy of the district goes out to Mr. and Mrs. Smart at this time.

Notice

A meeting of those interested in Liberal Policies will be held in the Fire Hall on Wednesday evening October 31 at 8:00 o'clock, for the purpose of organizing for the coming Provincial and Federal Elections. Everybody welcome.

Crossfield Team Third

The elimination contest to decide the winners of the Boys and Girls Calf Club Judging Competition held at Lacombe last Friday was won by the team of boys from Lacombe. The Crossfield team, Lila Havens and Kate Leask standing in third place, only a few points behind the winners. Three classes of cattle were judged.

This was a very creditable performance considering how little judging our Club did last year. The Department of Agriculture has promised to rectify this mistake next year.

Let's have some more members and make this a real Club. Full information from Secretary Harry May.

Clean Up

On visiting the fire hall and the secretary-treasurer's office upstairs on Saturday morning, we found both places to be in a dirty unkept condition. Ashes were strewn round the stove, and there was enough dirt on the floors to plant potatoes.

We would suggest that either the constable or night watchman be given instructions by the Council to keep this building tidy and clean, both upstairs and down.

Enjoyable Card Party

The Floral Local U.F.W.A. held a most enjoyable court whist drive in the U. F. A. hall on Monday night. Eighteen tables were in play. Prizes going to the following: Ladies, Mrs. Ed. Clark; gent's, Chas. Ferguson. A new feature, a travelling prize, was won by Mrs. R. T. Amery.

An excellent lunch was served at midnight, following which a short programme was greatly enjoyed. Mrs. P. Fleming and Clair Shiedal rendering solos. Mrs. R. T. Amery accompanist.

The singing of the national anthem brought to a close a very enjoyable social evening.

Executionist of Calgary, assisted by others will render the program

Silver collection to defray expenses.

Hallowe'en Tea October 26th.

The Mission Band will serve a Hallowe'en Tea at the home of Mrs. P. Fleming on Friday afternoon Oct. 26th from 3:30 to 6 o'clock. Adults 20c, children 10c.

Crossfield Dramatic Society

"The Valiant"

"The Valiant" is the third of the One-Act Plays to be presented by the above society on October 30. The cast is as follows: Florence Cruickshank, Fred Baker, Herbert Seville, Lester Spivey, Austin Williams and J. Dickson. We recommend Miss Cruickshank's handling of an intensely dramatic role as something not to be missed. John Dyke, a convicted murderer, is awaiting execution by hanging. The warden of the prison and Father Daley-Dyke's spiritual adviser have been discussing the murderer. The fact that Dyke has evinced no interest in religious matters, nor remorse for his crime, has created a painful impression upon the mind of Father Daley whose desire it is to save his impenetrable soul from eternal perdition. We find that to say any more may destroy your pleasure in the play, so we propose to generalize. Dyke's explanation of his attitude is both enlightening and unusual. Probably everyone has speculated upon the life that awaits us after death—"the undiscovered country, from whose bourn no traveller returns"—and whilst Dyke's views are undoubtedly true, are nevertheless less worthy of consideration. Many people shrink in horror from anything that savours of sacrilege, and for that reason may be inclined to condemn Dyke, but if we are not chewing the cud of unemotionalism and mental inertia, we should know what it means to scale the heights and plumb the depths of human experience.

"And until ye have passed beyond the one ye call Beyond the beyond that passes all— Yet have not rocked upon the bridge of thought. Ye have not even lived—or known the crime."

We ought to be able to see that the dark curtain of misfortune with which he is enveloped, is shot through with flashes from a soul which is essentially holy. Everyone is possessed of a spark of Divinity which will enable him to rise Phoenix-like above the ashes of his former self. Of certain master criminals who faced death with equanimity it has been truly said, that no act done by them in this world, was comparable with the manner of their leaving it. Thus we find Dyke ennobling the sad circumstances of his position, by meeting death with a sublime courage, entirely unrelated to religious hypnotism.

"Sleep dwell upon thine eyes, peace in thy breast, Would I were asleep and peace—so sweet to rest."—Shakespeare.

Want Tar Sand Walk on McIntyre Drive
Last Friday evening several friends met at Adam's for a bit of refreshment and after going into conference decided to adjourn to "the rendezvous" to partake of t-bone and onions by circuitous routes. One of the party went by motor car, another departed by shanks pony, while a third was detailed to salvage driftwood on the way.

The gent to whom was entrusted the care of the necessary parcels being slightly uncertain on his pins, discovered in his meanderings a new sidewalk somewhere around the Masonic Hall which is evidently made of tar sands and which he avers is superior to ordinary concrete, as bottled goods can be dropped on it without breaking, he also suggests that the Council put in a walk of this material on McIntyre Drive. Buy Alberta products.

Don't forget the dance in the East Community Hall tomorrow night (Friday). Good music.
